

Free Boater's GPS App for Your Android Phone

Marine Navigator Lite

Download from Play Store and install

Go to Right hand bottom corner and select import

Select NOAA US

Go to RNCs by State and then click on CA

When the download is complete, click on the zip file and it will give you 113 charts

When the chart downloads start, skip those areas you are not interested in.

For the Stockton area and most of the Delta, you only need to download **Sacramento and San Joaquin Rivers** and also **Stockton Deep Water Channel Antioch to Medford Island Panel A and Panel B**.

When you open the all, go to the circular arrows and click on the Sacramento and San Joaquin Rivers chart.

Next, click on the bottom center cursor until you see a little boat. The boat will show exactly where you are and will follow your position, giving you speed over ground in either knots or mph, your course over ground (compass heading), and position in latitude and longitude.

It is NOT a charting program, just a really good gps program.

I like it and use it.

Doug
