

**SAN JOAQUIN DELTA POWER SQUADRON'S**

# **VHF and VHF/DSC**

## **Seminar**

Join us on line Wednesday, August 24 at 7:00 pm

Freeconferencecall.com

Meeting ID: sjdpseducation

Hosted by Nick Patterson

Online Meeting Link: <https://join.freeconferencecall.com/sjdpseducation>

It is recommended that participants download the freeconference.com program on their computer and install the desktop app for the program to facilitate a faster connection log-in. There is also a free "fcc" app for mobile devices available through your app store.

When you join a meeting, you will be prompted to enter your name, e-mail, and meeting ID. Simply enter the information, and click "Join". Once you have joined and see the dialog box at the top of your screen, click on the phone receiver picture and then click on "Mic and Speakers". You will then be prompted to "Connect Now".

For purposes of this seminar, please do not activate your camera and please mute your microphone. There will be an opportunity at the end of the presentation to un-mute and ask questions to Nick. Doing so will allow for a clearer presentation with a minimum of feedback or interference. You may or may not want to use a headset depending on the speakers in your computer.

Feel free to contact Doug Sherman at [562-773-3684](tel:562-773-3684) any time prior to the day of the seminar if you would like to test your connection and he will be happy to do a "mini info session".

### **What to Expect**

The site will be open by 6:45 PM to allow participants the ability to check both video and audio connections. Once they have been checked, we ask you to turn them off so that we do not overload the connection.

When the presentation begins, Nick will enter a lecture mode which will automatically mute everyone attending. We will also be recording the presentation for those interested. (No problems per USPS)

Questions may be sent in via the chat room of the FCC system and will be answered in order received at the end of the presentation.

At the end of the presentation, the audio will be unmuted and the folks with chat questions will be asked to turn on their video as their question comes up so that others can see who is asking and the question/s will be answered. When done, that person may turn off his camera and the next question will be answered. Hopefully this will lend itself to an orderly q & a period. After that, other questions will then be taken in the same manner.
